

Silent Gliss 1280

With roller gliders for heavy duty.

The roller gliders cope with very heavy curtains. White finish with a purpose designed overlap arm – the first for hand drawn tracks. Fix at 600mm centres. Can be bent to a minimum radius of 150mm.

Silent Gliss 3840W

Exceptionally attractive ceiling fix track.

For use with the Silent Gliss Wave™ Curtain Heading System, this extremely efficient system is designed for ceiling fixing and is ideal for pelmets etc. Its appearance is the same from the back or front and since it uses 'secret' fixing clamps it can be used as a room divider. Fix every 30-60cm depending on the surface. For light to medium weight curtains. Can be bent to a minimum radius of 200mm.

Colours

A wide variety of colours is available as standard as shown. Silver, gold and bronze are available through anodisation processes. All other colours have a durable powder-coated finish. In addition to the standard colour a custom-colouring service is available. Overlap arms should not be used on anodised tracks as they impair efficiency.
