Roller Blind Fabrics

The slow ascent of the 4800 and other systems means that conventionally stiffened fabrics need not be used. Silent Gliss offer the Colorama range of soft washable fabrics with a unique ultrasonically sealed edge - the difference and sheer luxury of a soft roller blind have to be seen to be appreciated. Many other flame retardant fabrics are contained within our technical collection.

Using the laminating process we can take most of our fabrics from the Signé 2 Collection to create the ultimate in luxury domestic roller blinds.

As an alternative, we can take almost any fabric and laminate it with a backing cloth. This way designers can create their own blinds to enhance the overall look desired.
