

**Silent Gliss 8000 ▶**  
**Ultra reliable cord control operation.**

The mono control operation allows the user to tilt or raise / lower the blind with a single endless cord. An automatic braking system halts the blind if it encounters an obstruction, avoiding uneven tilting of the bottom bar. The aluminium headrail has a flange on the lower back edge to stop light ingress. Available with 15mm and 25mm slats.

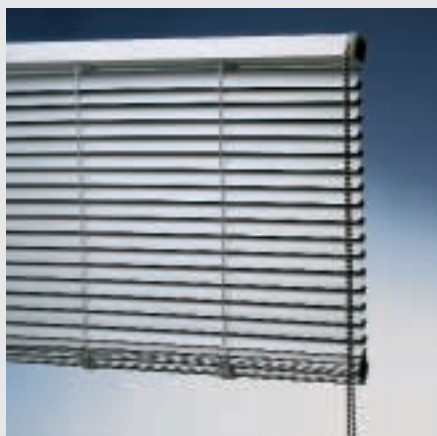

**◀ Silent Gliss 8100PC**  
**Privacy blind with no visible holes when closed.**

The cord holes are at the rear of the slats ensuring no direct light penetration when slats are closed. Together with its special headrail flange this makes the 8100PC system ideal for use in offices and helps compliance with EC computer shading regulations. The unique user-friendly control wand combines precise tilt operation with integrated cords for fast raising / lowering of the blind. 25mm slats only.

**Silent Gliss 8200 ▶**  
**Chain operated mono-control blind.**

The 8200 incorporates the sophisticated Silent Gliss Flex Speed gearing system allowing simple and efficient operation of the blind. The mono-control chain mechanism is situated at the front of the headrail for ease of operation and allowing systems to be fitted side by side without leaving a gap. 25mm slats only.

**◀ Silent Gliss 8250**  
**Electrically operated blind.**

The 8250 combines the benefits of system 8200 with electric operation. Ideal for situations where multiple blinds need operating or for hard-to-reach windows. 25mm slats only. Suitable for blinds up to 3m wide and 3m drop.

**Silent Gliss 8900/8950 ▶**

**Available in Wood (25mm/50mm slats) or Aluminium (50mm slats only).**

System 8900 (pictured), mono control operation allows the user to tilt, raise and lower the blind with a single endless cord. This avoids trailing/dangling cord and confusion for the user. System 8950 is electrically operated using either wall switch or remote control. The headrail uses a slat in the same colour/material for improved appearance. A wide range of finishes are available.
